SUMMARY OF THE COURSE

In this course, you will have an opportunity to build on or extend interests developed in your specialist area of education by undertaking a self-directed small-scale individual capstone project, supported by a supervising academic, in small groups with other students from the same specialisation. The project must demonstrate synthesis and application of knowledge and skills developed in coursework components of your specialisation to address a particular problem or issue in a previous or current work context.

THE MAIN WAYS IN WHICH THE COURSE HAS CHANGED SINCE LAST TIME AS A RESULT OF STUDENT FEEDBACK:

As this is an independent project with limited supervision, some students said they found it difficult to navigate the requirements and structure of the course, and to understand how to work with their advisors. We have developed a framework of online support resources and a course help forum to address this.

4. RATIONALE FOR THE INCLUSION OF CONTENT AND TEACHING APPROACH

This course is being offered to provide students with an opportunity to undertake a small-scale capstone project in a specific area of their specialisation in education. The course will also enable students to develop a deeper reflective approach to education and demonstrate the ability to analyse, evaluate, synthesise and apply knowledge and skills from earlier stages of their program.

5. TEACHING STRATEGIES AND RATIONALE

EDST5888 is a self-directed course. Optional group meetings at the beginning (Week 1) and towards the end (Week 10) of the semester may be organised by some supervising lecturers. These meetings will cover general issues in conducting small-scale projects in your area of specialisation, as well as the preparation required (e.g. developing a project proposal and a clear feasible plan for implementation). The initial session is designed to stimulate student thinking because there are a number of issues that students will need to address so that a feasible project can be developed. In the follow up meeting individual/group discussions and peer mentorship/support will be utilised to increase the capacity and capability of students for conducting small-scale projects. These activities will occur in a climate that is supportive and inclusive of all learners

6. COURSE CONTENT AND STRUCTURE

This course is an independent project. You will be allocated an advisor who will work with you in a limited way (approximately 3 hours in total over the entire term) to advise you on your project proposal and final report.
