## SUMMARY OF COURSE

This course provides a systematic study of the theory and practice of teacher leadership, its background, and its central features. The basic stance of the course is that teachers at all points in their career can engage in leadership practices, and that such practices can be many and varied. The course is normative and analytical rather than descriptive. Thus, it will be primarily concerned with suggesting ways in which teacher leadership can be manifested, interpreted, and applied to bring about improvement in schools, particularly the improvement of student learning outcomes.

A key aspect of the course is to locate teacher leadership within an extended notion of teacher professionalism, given the range of issues that teacher-leaders deal with.

## THE MAIN WAYS IN WHICH THE COURSE HAS CHANGED SINCE LAST TIME AS A RESULT OF STUDENT FEEDBACK:

The biggest change has been driven by Covid-19 restrictions and the need to offer the course fully online. As previous feedback urged more student engagement, I shall try to do this in the rather restrictive context of an online environment.

## STUDENT LEARNING OUTCOMES

Outcome		Assessment/s
1	Discuss critically the nature of teacher leadership both theoretically and how it manifests in different school contexts.	1, 2
2	Identify and analyse research evidence, both local and international, with respect to what is claimed on behalf of teacher leadership.	1, 2
3	Develop a relatively systematic understanding of what teacher leadership would mean to your school or organizational context.	1, 2

## PROGRAM LEARNING OUTCOMES

Standard		Assessment/s
1	<b>Advanced disciplinary knowledge and practices</b> Demonstrate an advanced understanding of the field of education as it relates to their.6 p0ed understanding ofmo	

#### 4. RATIONALE FOR THE INCLUSION OF CONTENT AND TEACHING APPROACH

Ideas about teacher leadership have been under development in the research literature for at least the last twenty years. The main motivation for this has been the influence of models of distributed leadership, especially arising out of reforms to do with school-based management. Ironically, these reforms initially did much to emphasize the concentration of leadership in school principals. However, this was increasingly recognized as unrealistic and soon gave way to practices for distributing the demands of leadership. With the further demand that school reform delivers strong growth in student learning outcomes, the focus has now shifted back to teachers and the kinds of leadership roles they can play. The course examines contemporary debates over the nature of teacher leadership, its scope and limits, ways in which it can be developed, and organizational structures that are complementary to its expression. Since many of these issues need to be negotiated and worked out in ways sensitive to individual school contexts, this course teaches a methodology of leadership as critical learning. The structure and content of the course seeks to reflect this critical methodology by way of course pedagogy, with students being able to see where ideas came from and what led to their replacement. The teaching approach is thus one of critical engagement with the research literature and the current research of staff teaching the course. The approach to teaching and learning is informed by research. This research has demonstrated the importance of the learning environment for quality student learning. Therefore, emphasis is placed on a learning environment which is student-centred, knowledge-centred, assessment-centred, and community-centred.

#### 5. TEACHING STRATEGIES

The model that I favour for Teacher Leadership is individual learning taking place in the context of organizational learning. I shall try to have this goal carry over into the online environment. The course will use explicit instruction designed to stimulate student thinking because there are a number of theories which must be understood, and online group discussion, activities and case studies designed to increase the capacity and capability of students for developing their own understandings of and approaches to teacher leadership and its implementation.

assessment. All assessment will be submitted online via Moodle by 5pm. Students are also required to keep all drafts, original data, and other evidence of the authenticity of the work for at least one year after examination. If an assessment is mislaid the student is responsible for providing a further copy. Please see the Student Policies and Procedures for information regarding submission, extensions, special consideration, late penalties and hurdle requirements etc. <https://education.arts.unsw.edu.au/students/courses/course-outlines/>

### **Assessment Details**

#### **Assessment 1**

Different authors have different views about teacher leadership, meaning that the concept is contested. However, it can still be the case that some views are more defensible than others and it can still be the case that there may be a core set of common ideas about teacher leadership among the different viewpoints. Critically discuss what you consider to be the most defensible account of teacher leadership. The relevant materials are those from topics 1-6 found in the topic folders on Moodle.

#### **Assessment 2**

Critically discuss what you think teacher-leaders need to know and do to contribute effectively to school improvement and better student learning outcomes in your organisational context (or one you are familiar with). The relevant materials are those from the whole course.

Appropriate readings for these assignments are contained in the topic folders uploaded onto Moodle. The folders also contain an information sheet that (1) summarises the topic, (2) raises some key questions that the class needs to address, and (3) gives bibliographic details of important readings. Each topic folder contains a PowerPoint.
