

**MATHEMATICS ENRICHMENT CLUB.**  
**Problem Sheet 3, May 21, 2018**

1. The perimeter of a base of a rectangular brick with integer sides is 18 cm, whilst its volume is  $42 \text{ cm}^3$ . What is its height?
2. A palindromic number is a 'symmetrical' number which reads the same forwards as backwards. For example, 55, 101 and 8668 are palindromic numbers. There are 90 four-digit palindromic numbers.

How many of these four-digit palindromic numbers are divisible by 7?  
(AMC 2009 Senior Division Q21)

3. What is the area, in square centimetres, of the parallelogram that would fit snugly around 6 circles, each of radius 3 cm, as shown in the diagram?

(AMC 2009 Senior Division Q22)

4. Suppose that a triangle has sides  $a$ ,  $b$  and  $c$  such that  $a + b + c = 2$ .  
(a) Show that  $(1 - a)(1 - b)(1 - c) < c$
