1. Information about the Course	
FACULTY	Science
SCHOOL OR DEPARTMENT	Psychology

4. Aims of the Course

Lectures:

This course focuses on elementary learning processes. These include: learning about relations between events (Pavlovian conditioning), learning about relations between one's behaviour and events (Instrumental conditioning), how these forms of learning control behaviours and their involvement in addiction, attachment and schizophrenia. The course emphasises psychological explanations of behaviour but also seeks to ground these processes in neurobiology.

The course is divided into four sections:

- 1) Westbrook: The history, development and behavioural basis of ass
